Copyright protection claimed includes all forms and matters of copyrightable materials and information now allowed by statutory or judicial law or hereinafter granted. Product names used in this document may be trademarks or registered trademarks of their respective companies and are hereby acknowledged. All non-ADJ Products, LLC brands and product names are trademarks or registered trademarks of their respective companies.

ADJ Products, LLC and all affiliated companies hereby disclaim any and all liabilities for property, equipment, building, and electrical damages, injuries to any persons, and direct or indirect economic loss associated with the use or reliance of any information contained within this document, and/or as a result of the improper, unsafe, insufficient and negligent assembly, installation, rigging, and operation of this product.

FCC STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC RADIO FREQUENCY INTERFERENCE WARNINGS & INSTRUCTIONS

This product has been tested and found to comply with the limits as per Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device uses and can radiate radio frequency energy and, if not installed and used in accordance with the included instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following methods:

- Reorient or relocate the device.
- Increase the separation between the device and the receiver.
- Connect the device to an electrical outlet on a circuit different from which the radio receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

DOCUMENT VERSION

Due to additional product features and/or enhancements, an updated version of this document may be available online.

Please check www.adj.com for the latest revision/update of this manual before beginning installation and/or programming.

Unpacking: Thank you for purchasing the Starbar Wash by ADJ Products, LLC. Every Starbar Wash has been thoroughly tested and has been shipped in perfect operating condition. Carefully check the shipping carton for damage that may have occurred during shipping. If the carton appears to be damaged, carefully inspect your fixture for any damage and be sure all accessories necessary to operate the unit has arrived intact. In the case damage has been found or parts are missing, please contact our toll free customer support number for further instructions. Do not return this unit to your dealer without first contacting customer support.

Introduction: The Starbar Wash is a DMX intelligent, LED wash lighting par system. This system has five operating modes: Sound Active mode, Auto Run mode, RGBW dimmer mode, Static Color mode, and DMX control mode. The Starbar Wash has 5 DMX channel modes; 4/5/6/17/19.

These instructions contain important safety information regarding the use and maintenance of this unit. Please keep this manual with the unit, for future reference.

Customer Support: Contact ADJ Service for any product related service and support needs. Also visit forums.adj.com with questions, comments or suggestions.

Parts: To purchase parts online visit <http://parts.americandj.com>

Caution! There are no user serviceable parts inside this unit. Do not attempt any repairs yourself, doing so will void your manufactures warranty. In the unlikely event your unit may require service please contact ADJ Products, LLC.

PLEASE recycle the shipping carton when ever possible.

Starbar Wash

Features

- Multi-Colors
- Five Operating Modes
- Electronic Dimming 0-100%
- DMX-512 protocol
- 3-Pin DMX Connection
- Five DMX Modes: 4/5/6/17/19
- UC IR & Airstream IR Compatible (Not Included)
- Multiple Unit Power Linking (See page 28)

Included:

- 1 x Light Bar with 4 x LED Pars
- 1 x Tripod
- 1 x Foot Controller
- 2 x Brackets
- 1 x Carrying Bag
- 1 x Power Cable

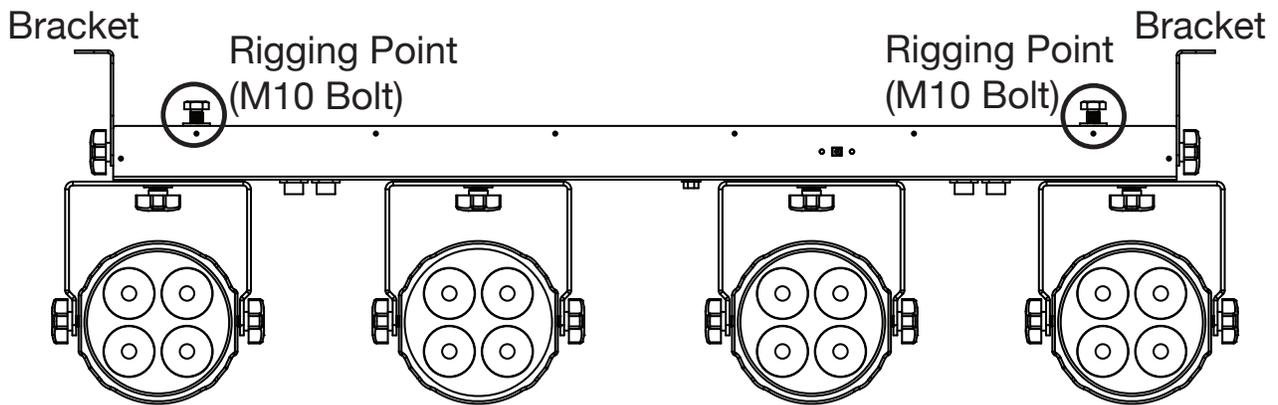

Starbar Wash

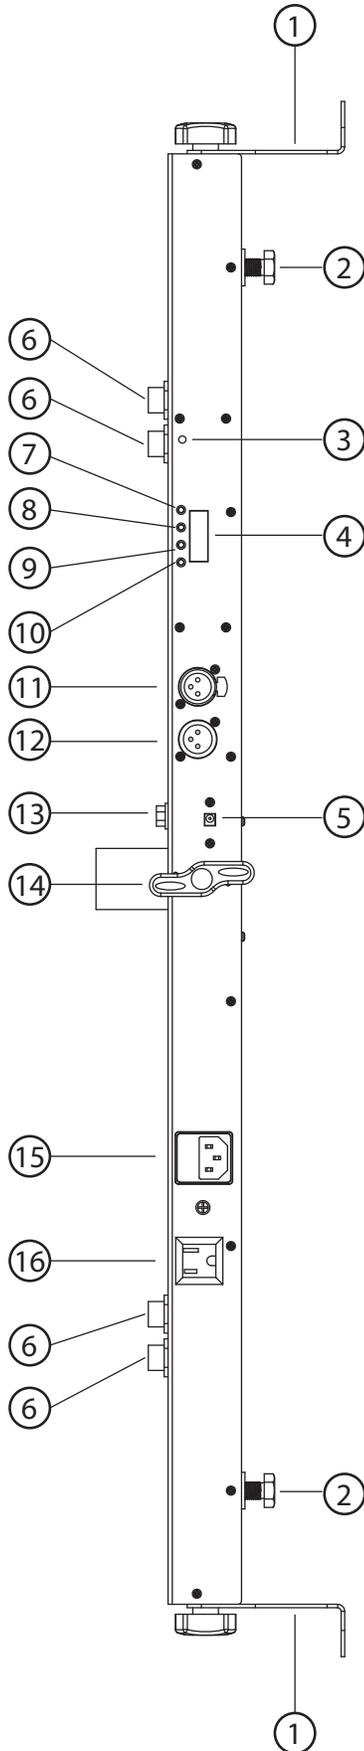

Warranty Registration

The Starbar Wash carries a 1 year limited warranty. Please fill out the enclosed warranty card to validate your purchase. All returned service items whether under warranty or not, must be freight pre-paid and accompany a return authorization (R.A.) number. The R.A. number must be clearly written on the outside of the return package. A brief description of the problem as well as the R.A. number must also be written down on a piece of paper included in the shipping carton. If the unit is under warranty, you must provide a copy of your proof of purchase invoice. You may obtain a R.A. number by contacting our customer support team on our customer support number. All packages returned to the service department not displaying a R.A. number on the outside of the package will be returned to the shipper.

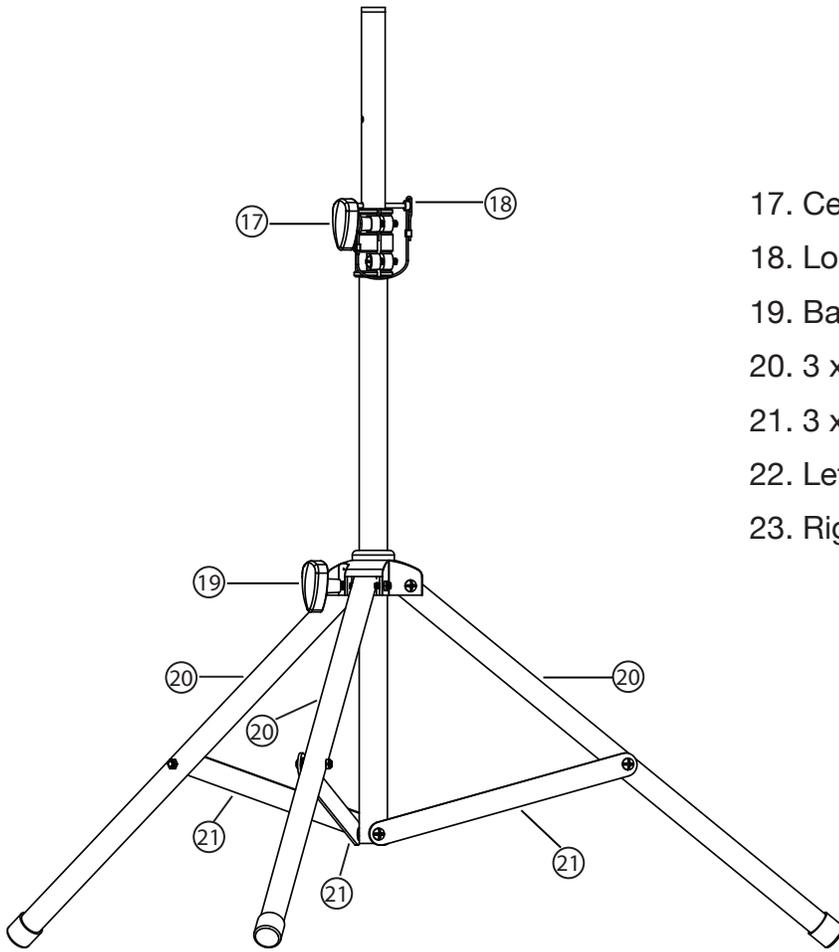

- To reduce the risk of electrical shock or fire, do not expose this unit rain or moisture
- Do not spill water or other liquids into or on to your unit.
- Do not attempt to operate this unit if the power cord has been frayed or broken. Do not attempt to remove or break off the ground prong from the electrical cord. This prong is used to reduce the risk of electrical shock and fire in case of an internal short.
- Disconnect from main power before making any type of connection.
- Do not remove the cover under any conditions. There are no user serviceable parts inside.
- Never operate this unit when it's cover is removed.
- Never plug this unit in to a dimmer pack
- Always be sure to mount this unit in an area that will allow proper ventilation. Allow about 6" (15cm) between this device and a wall.
- Do not attempt to operate this unit, if it becomes damaged.
- This unit is intended for indoor use only, use of this product outdoors voids all warranties.
- During long periods of non-use, disconnect the unit's main power.
- Always mount this unit in safe and stable matter.
- Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to the point they exit from the unit.
- Cleaning -The fixture should be cleaned only as recommended by the manufacturer. See page 28 for cleaning details.
- Heat -The appliance should be situated away from heat sources such as radiators, heat registers, stoves, or other appliances (including amplifiers) that produce heat.
- The fixture should be serviced by qualified service personnel when:
 - A. The power-supply cord or the plug has been damaged.
 - B. Objects have fallen, or liquid has been spilled into the fixture.
 - C. The fixture has been exposed to rain or water.
 - D. The fixture does not appear to operate normally or exhibits a marked change in performance.
 - E. The fixture has fallen and/or subjected to extreme handling.

The unit can be mounted using mounting clamps (not provided), affixing them to either the mounting brackets that are provided with the unit or the rigging points located at the top of the bar. Always ensure that the unit is firmly fixed to avoid vibration and slipping while operating. Always ensure that the structure to which you are attaching the unit is secure and is able to support a weight of 10 times the unit's weight. When hanging the unit by the rigging points or brackets, always use and install a safety cable as a safety measure to prevent accidental damage and/or injury in the event the clamp fails. The equipment must be installed by a professional, and it must be installed in a place where it is out of the reach of people's grasp.

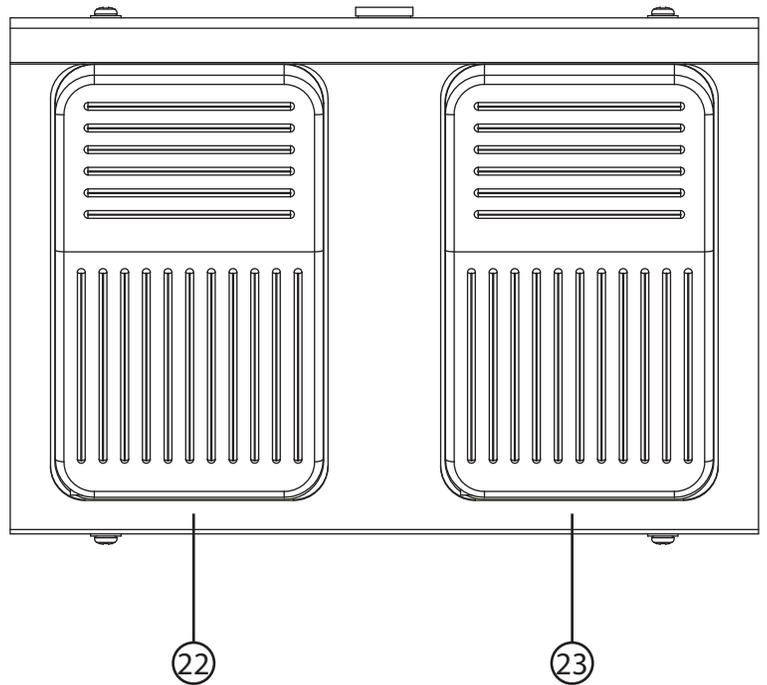

OVERHEAD INSTALLATION

- 1. 2 x Brackets
- 2. 2 x Rigging Points (M10 Bolts Included)
- 3. Microphone
- 4. LCD Display
- 5. IR Sensor
- 6. 4 x Par 6-Pin Connections
- 7. MENU Button
- 8. UP Button
- 9. DOWN Button
- 10. ENTER Button
- 11. 3-Pin DMX Out
- 12. 3-Pin DMX In
- 13. Foot Controller 3-Pin Connection
- 14. Light Bar Adjustment Knob
- 15. I.E.C. Power Input & Fuse Holder
- 16. Power Output (Edison Socket)

- 17. Center Adjustment Knob
- 18. Locking Pin
- 19. Base/Leg Adjustment Knob
- 20. 3 x Tripod Legs
- 21. 3 x Tripod Stays
- 22. Left Foot Pedal
- 23. Right Foot Pedal

DMX-512: DMX is short for Digital Multiplex. This is a universal protocol used as a form of communication between intelligent fixtures and controllers. A DMX controller sends DMX data instructions from the controller to the fixture. DMX data is sent as serial data that travels from fixture to fixture via the DATA “IN” and DATA “OUT” XLR terminals located on all DMX fixtures (most controllers only have a DATA “OUT” terminal).

DMX Linking: DMX is a language allowing all makes and models of different manufactures to be linked together and operate from a single controller, as long as all fixtures and the controller are DMX compliant. To ensure proper DMX data transmission, when using several DMX fixtures try to use the shortest cable path possible. The order in which fixtures are connected in a DMX line does not influence the DMX addressing. For example; a fixture assigned a DMX address of 1 may be placed anywhere in a DMX line, at the beginning, at the end, or anywhere in the middle. When a fixture is assigned a DMX address of 1, the DMX controller knows to send DATA assigned to address 1 to that unit, no matter where it is located in the DMX chain.

Data Cable (DMX Cable) Requirements (For DMX Operation): The Starbar Wash can be controlled via DMX-512 protocol. The Starbar Wash has 5 DMX channel modes. The DMX address is set on the back panel of the Starbar Wash. Your unit and your DMX controller require a standard 3-pin XLR connector for data input and data output (Figure 1). We recommend Accu-Cable DMX cables. If you are making your own cables, be sure to use standard 110-120 Ohm shielded cable (This cable may be purchased at almost all pro lighting stores). Your cables should be made with a male and female XLR connector on either end of the cable. Also remember that DMX cable must be daisy chained and cannot be split.

Figure 1

Notice: Be sure to follow figures two and three when making your own cables. Do not use the ground lug on the XLR connector. Do not connect the cable’s shield conductor to the ground lug or allow the shield conductor to come in contact with the XLR’s outer casing. Grounding the shield could cause a short circuit and erratic behavior.

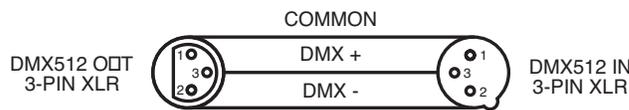

Figure 2

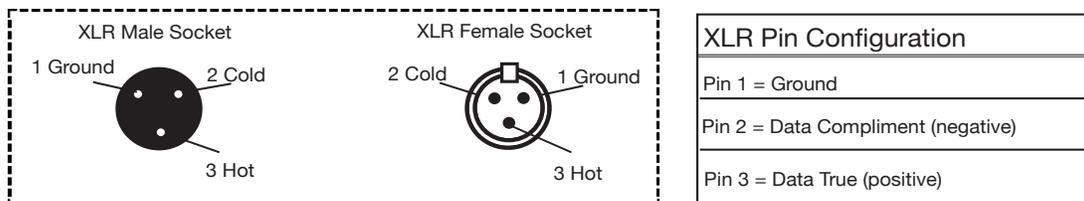

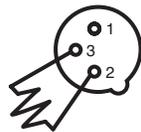

Figure 3

Special Note: Line Termination. When longer runs of cable are used, you may need to use a terminator on the last unit to avoid erratic behavior. A terminator is a 110-120 ohm 1/4 watt resistor which is connected between pins 2 and 3 of a male XLR connector (DATA + and DATA -). This unit is inserted in the female XLR connector of the last unit in your daisy chain to terminate the line. Using a cable terminator (ADJ part number Z-DMX/T) will decrease the possibilities of erratic behavior.

Termination reduces signal errors and avoids signal transmission problems and interference. It is always advisable to connect a DMX terminal, (Resistance 120 Ohm 1/4 W) between PIN 2 (DMX-) and PIN 3 (DMX +) of the last fixture.

Figure 4

5-Pin XLR DMX Connectors. Some manufactures use 5-pin DMX-512 data cables for DATA transmission in place of 3-pin. 5-pin DMX fixtures may be implemented in a 3-pin DMX line. When inserting standard 5-pin data cables in to a 3-pin line a cable adaptor must be used, these adaptors are readily available at most electric stores. The chart below details a proper cable conversion.

3-Pin XLR to 5-Pin XLR Conversion		
Conductor	3-Pin XLR Female (Out)	5-Pin XLR Male (In)
Ground/Shield	Pin 1	Pin 1
Data Compliment (- signal)	Pin 2	Pin 2
Data True (+ signal)	Pin 3	Pin 3
Not Used		Do Not Use
Not Used		Do Not Use

All fixtures should be given a DMX starting address when using a DMX controller, so the correct fixture responds to the correct control signal. This digital starting address is the channel number from which the fixture starts to “listen” to the digital control signal sent out from the DMX controller. The assignment of this starting DMX address is achieved by setting the correct DMX address on the digital control display on the fixture.

You can set the same starting address for all fixtures or a group of fixtures, or set different addresses for each individual fixture. Setting all fixtures to the same DMX address will cause all fixtures to react in the same way, in other words, changing the settings of one channel will affect all the fixtures simultaneously.

If you set each fixture to a different DMX address, each unit will start to “listen” to the channel number you have set, based on the quantity of DMX channels of each fixture. That means changing the settings of one channel will only affect the selected fixture.

In the case of the Starbar Wash, when in 4 channel mode you should set the starting DMX address of the first unit to 1, the second unit to 5 (4 + 1), the third unit to 9 (5 + 4), and so on. (See chart below for more details.)

Channel Mode	Unit 1 Address	Unit 2 Address	Unit 3 Address	Unit 4 Address

Operating Modes:

The Starbar Wash has six operating modes:

- DMX control mode - This function will allow you to control each individual fixtures traits with a standard DMX 512 controller.
- RGBW Dimmer Mode - Choose one of the four colors to remain static or adjust the intensity of each color to make your own color.
- Sound Active mode - The unit will react to sound, chasing through the built in programs. The sound sensitivity is adjustable
- Color Change Mode - There are 10 built-in color change programs to choose from. The color change speed is adjustable.
- Color Fade Mode - There are 10 built-in color fade programs to choose from. The color fade speed is adjustable.
- Color Macro Mode - There are 64 colors to choose from.

DMX Mode:

Operating through a DMX controller gives the user the freedom to create their own programs tailored to their own individual needs. The Starbar Wash has 5 DMX modes: 4 Channel mode, 5 Channel mode, 6 Channel mode, 17 Channel mode, and a 19 Channel mode. See pages 12-13 for the DMX values and traits.

1. This function will allow you to control each individual fixture's traits with a standard DMX 512 controller.
2. To run your fixture in DMX mode press the MENU button until "XXXX" is displayed. "XXXX" represents the current displayed DMX channel mode and address. Use the MENU button to find your desired DMX channel mode and use the UP or DOWN buttons to find your desired DMX address.
3. The Channel modes are listed below:
 - To run the 4 Channel Mode, press the MODE button until "1XXX" is displayed. This is the 4 channel DMX mode and address setting.
 - To run the 5 Channel Mode, press the MODE button until "2XXX" is displayed. This is the 5 channel DMX mode and address setting.
 - To run the 6 Channel Mode, press the MODE button until "3XXX" is displayed. This is the 6 channel DMX mode and address setting.
 - To run the 17 Channel Mode, press the MODE button until "4XXX" is displayed. This is the 17 channel DMX mode and address setting.
 - To run the 19 Channel Mode, press the MODE button until "5XXX" is displayed. This is the 19 channel DMX mode and address setting.
4. Please see pages 12-13 for the DMX values and traits.
5. After you have chosen your desired DMX Channel mode and address plug in the fixture via the XLR connections to any standard DMX controller.

Color Macro Mode:

In this mode you can choose 1 of 64 colors for output. Adjustable strobing is available for this mode.

1. Plug the fixture in and press the MENU button until "CLXX" is displayed. "XX" is the color number currently displayed.
2. There are 64 colors to choose from. Use the UP and DOWN buttons to find your desired color.
3. Press the MENU button again to access the strobe setting. "S.S.XX" will now be displayed. "XX" represents the current strobe setting.
4. Use the UP and DOWN buttons to adjust the strobe rate between "00" (off) to "16" (fast strobing).

Color Change Mode and Color Fade Mode:

In this mode you can choose 1 of 10 color change programs or 1 of 10 color fade programs to run. The running speed of both programs are adjustable.

1. Plug the fixture in and press the MENU button until “CPXX” is displayed. “CP” is color change mode and “XX” is the color change program number that is currently displayed.
2. Use the UP or DOWN button to find your desired color change program.
3. Press the MENU button again, and “FPXX” will be displayed. “FP” is color fade mode and “XX” is the color fade program number that is currently displayed.
4. Use the UP or DOWN button to find your desired color fade program.
5. Press the MENU button again to access the program speed setting. “PS.XX” will now be displayed. “XX” represents the current speed setting.
6. Use the UP and DOWN buttons to adjust the speed setting between “00” (slowest) to “16” (fastest). The speed setting will be the same for both color change and color fade programs.

Sound Active Mode:

In this mode the Starbar Wash will react to sound, and chase through the different colors. There are 5 sound active modes to choose from with adjustable sound sensitivity.

1. Plug the fixture in and press the MENU button until “SoXX” is displayed. “XX” represents the current sound active mode. Use the UP and DOWN buttons to find your desired sound active mode.
2. Press the MENU button again to access the sound sensitivity adjustment setting. “SnXX” will now be displayed. “XX” represents the current sound sensitivity level.
3. Use the UP and DOWN buttons to adjust the sound sensitivity level between “01” (least sensitive) to “08” (most sensitive).

RGBW Dimmer Mode:

In this mode you can adjust the individual colors to make your desired color. Adjustable strobing is available for this mode.

1. Plug the fixture in and press the MENU button until:
2. “rXXX” is displayed you are in Red dimming mode. Use the UP and DOWN buttons to adjust the intensity. After you have finished adjusting the intensity, or if you would like to skip to the next color, press the MENU button.
3. When “GXXX” is displayed you are in Green dimming mode. Use the UP and DOWN buttons to adjust the intensity.
4. When “bXXX” is displayed you are in Blue dimming mode. Use the UP and DOWN buttons to adjust the intensity.
5. When “UXXX” is displayed you are in White dimming mode. Use the UP and DOWN buttons to adjust the intensity.
6. Press the MENU button again to access the strobe setting. “S.FXX” will now be displayed. “XX” represents the current strobe setting.
7. Use the UP and DOWN buttons to adjust the strobe rate between “00” (off) to “16” (fast strobing).

Activate IR Control:

This function is used to activate and deactivate the IR remote control sensor. When this function is activated you can control the fixture using the ADJ UC IR remote or Airstream IR app. Please see page 21 for remote controls and functions.

1. Plug the fixture in and press the MENU button until “IrXX” is displayed. “XX” represents either “on” or “oFF”.
2. Press the UP or DOWN buttons to either activate the remote sensor (On) or deactivate it (Off).

Display On/Off:

This function is used to control the display status. The display can be set to stay on at all times or turn off after 10 seconds.

1. Plug the fixture in and press the MENU button until “dXX” is displayed. “XX” represents either “on” or “oFF”.
2. Press the UP or DOWN buttons to toggle between the display being “On” at all times or turn “Off” after 10 seconds.

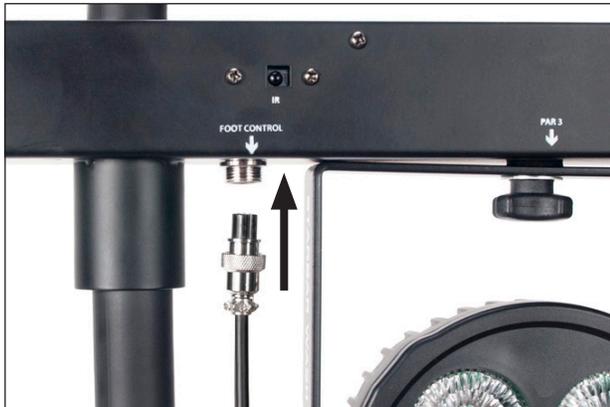

Master-Slave Configuration:

This function will allow you to link units together to run in a Master-Slave set up. In a Master-Slave set up one unit will act as the controlling unit and the others will react to the controlling units operating mode. Any unit can act as a Master or as a Slave however, only one unit can be programmed to act as the “Master.”

Master-Slave Connections and Settings:

1. Daisy chain your units via the XLR connector on the rear of the unit. Use standard XLR data cables to link your units together. Remember that the Male XLR connector is the input and the Female XLR connector is the output. The first unit in the chain (master) will use the female XLR connector only. The last unit in the chain will use the male XLR connector only.
2. Set the “Master” unit to your desired mode of operation.
3. Connect the first “Slave” unit to the “Master.”
4. Set the Slave unit(s) to any DMX setting. The “Slave” unit(s) will now follow the “Master”.

The included Starbar Wash foot controller comes with basic controls and is very easy to use. Connect the foot controller to the light bar using the foot controller 3-Pin cable.

PEDAL	CONTROL	FUNCTION
LEFT	1st Press	White
	2nd Press	Red
	3rd Press	Green
	4th Press	Blue
	5th Press	Yellow
	6th Press	Magenta
	7th Press	Cyan
	8th Press	Color Change in a continuous loop
	9th Press	Color Fade in a continuous loop

PEDAL	CONTROL	FUNCTION
RIGHT	Press Once*	Blackout
	Press & Hold for 2 Seconds**	3 Second Fade Out, 3 Second Fade In
BOTH	Press Both Simultaneously	Activate/Deactivate Sound Active Mode
	Press & Hold Both Simultaneously	Activate/Deactivate Strobing

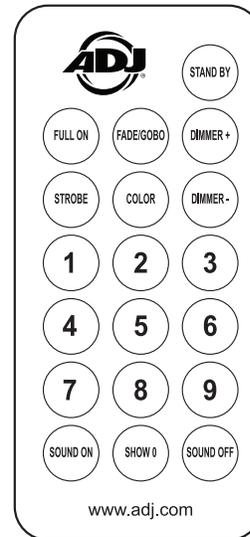

*Press once to activate the Blackout function. Press the pedal again to return to previous running mode.

**Current running mode will fade to blackout. Press and hold again to fade back in to previous running mode. Press the pedal once to automatically return to previous running mode.

The **ADJ UC IR** (not included) infrared remote gives you control of various functions (See below). To control the Starbar Wash you must aim the remote at the front or rear of the fixture bar and be no more than 30 feet away. To use the ADJ UC IR you must first activate the fixtures infrared sensor. To activate the sensor please see the instructions on page 19.

The **ADJ Airstream IR** remote transmitter (not included) plugs into the headphone jack of your iOS phone or tablet. To control your fixture, raise the volume to the maximum level on your iOS phone or tablet, aim the transmitter at the fixture sensor, and be no more than 15 feet away. The Airstream app is a free download from the app store for your iOS phone or tablet. The app comes with 3 pages of control depending on the fixture you are using. Please see below for IR functions including the corresponding app page.

Works with App page 1

STAND BY

Press this button to activate and deactivate remote control functionality.

FULL ON

Press this button to activate “full on”. Press any button to return to normal output/function.

FADE/GOBO

Press this button to activate and deactivate fade mode. Use the number buttons 1-9 to adjust the speed.

DIMMER “+” and DIMMER “-”

Press these buttons to adjust the output intensity.

STROBE

Press this button to activate strobing. Press the button again to stop strobing. Use the number buttons 1-9 to adjust the strobe speed. “1” being the slowest, and “9” being the fastest.

COLOR

Press this button activate static color mode. Use the number buttons 1-9 to find your desired color.

1-9

These number buttons are used for fade speed, strobe speed, color selection, and show selection.

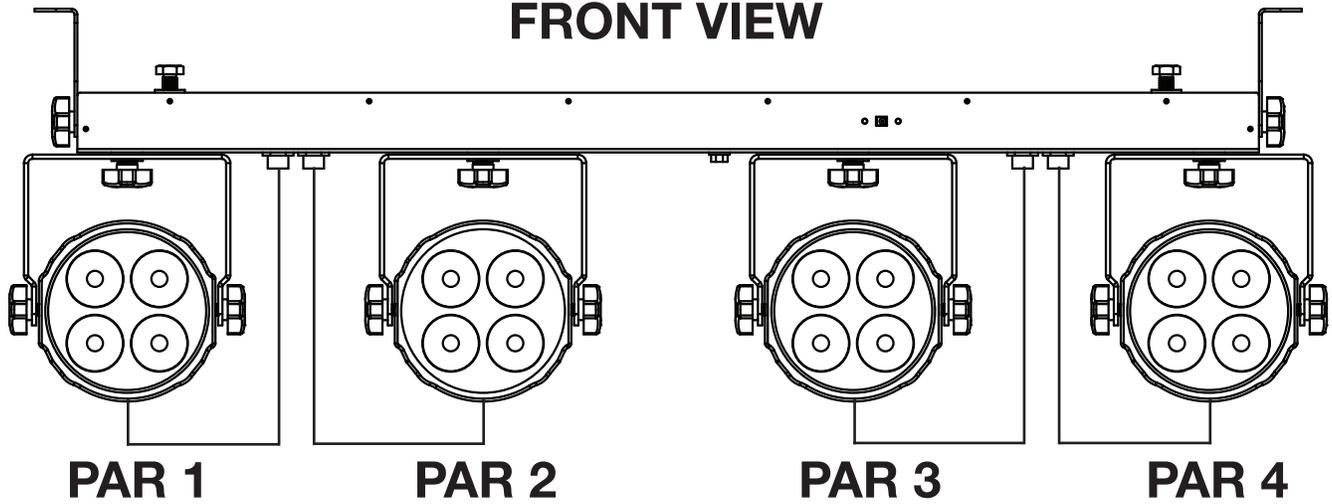

SOUND ON & OFF

These buttons activate and deactivate sound active mode.

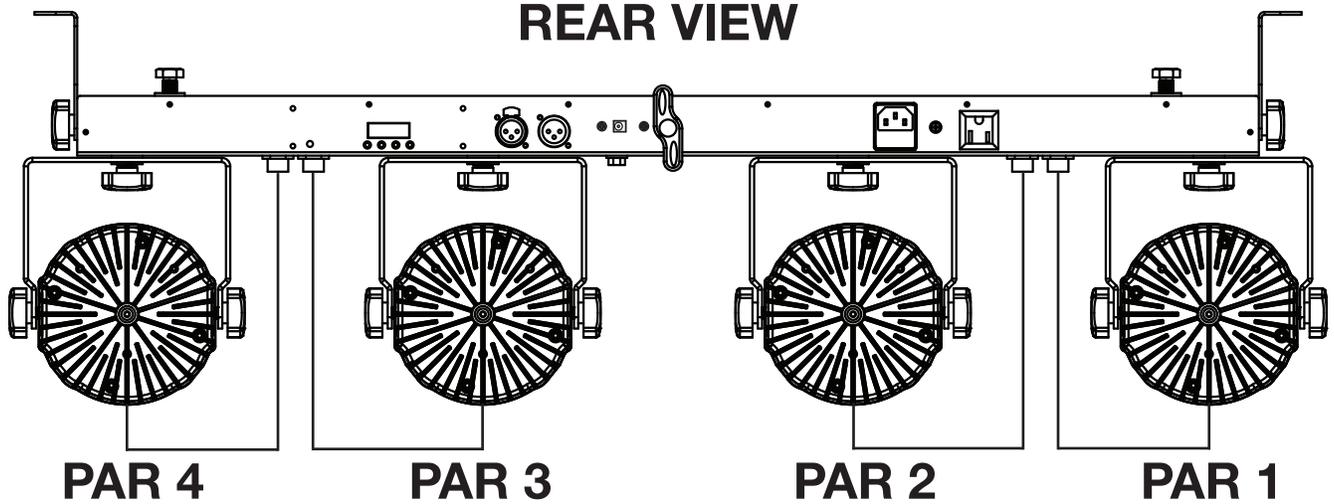

SHOW 0

Press this button activate show mode. Use the number buttons 1-9 to find your desired show.

Installation:

The Starbar Wash can be installed using the supplied tripod (light stand), using the supplied brackets, or hung from a fixture using clamps (optional).

Stand:

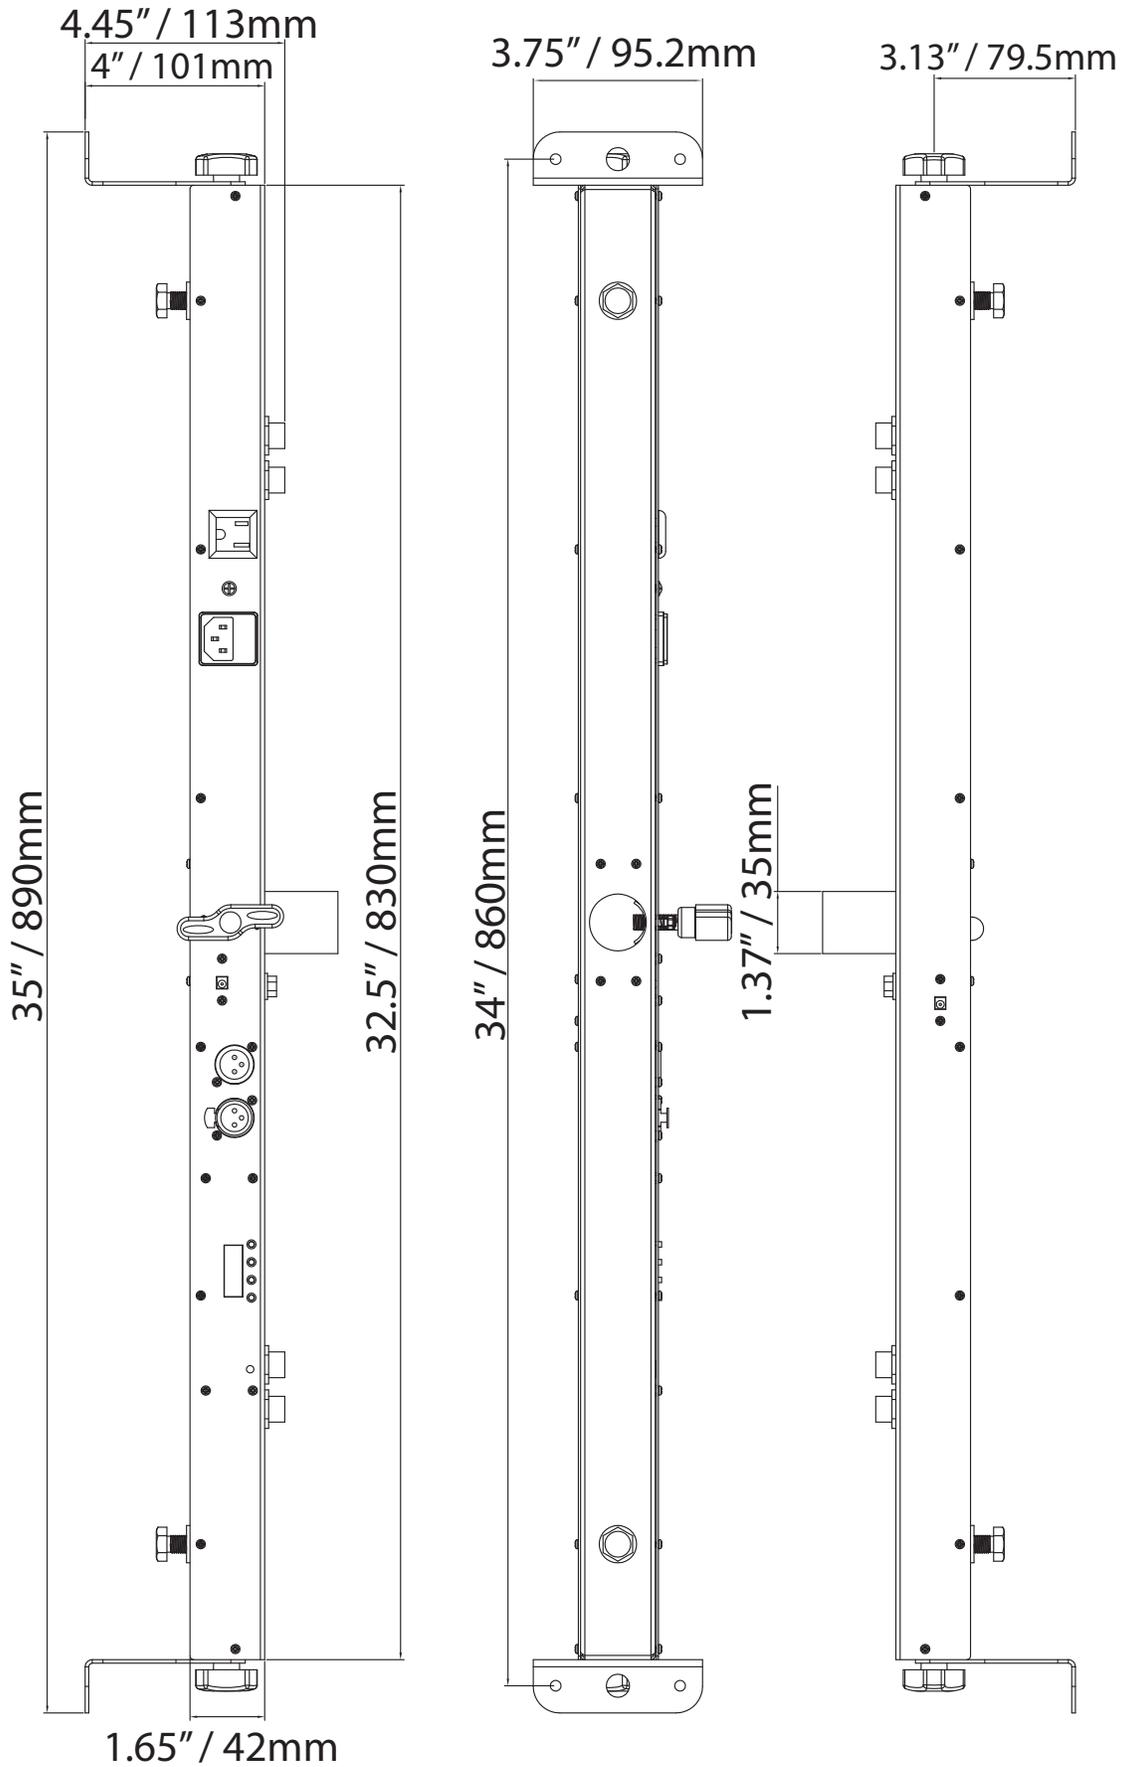

1. Set the tripod on an even and stable surface. Extend the legs until the stays are horizontal and secure the base by turning the knob at the base clockwise. **Note: For safety, please use sandbags to secure the tripod legs to prevent accidental tip overs.**
2. Raise the center section to the desired height and insert safety pin. Tighten adjustment knob to secure the center section.
3. Install the tripod adjustment knob on the Starbar Wash (between the two spring loaded screws) **(see Figure 1)**. **DO NOT** tighten at this time.
4. Place the Starbar Wash onto the top section of the tripod with the tripod going through the tripod mount at the center of the Starbar Wash **(see Figure 2)**.
5. Tighten the adjustment knob by turning clockwise. Tighten until the top section is secure **(see Figure 3)**. Be careful not to over tighten.
6. Raise the top section of the tripod to the final desired height and insert safety pin. Tighten adjustment knob to secure the top section.

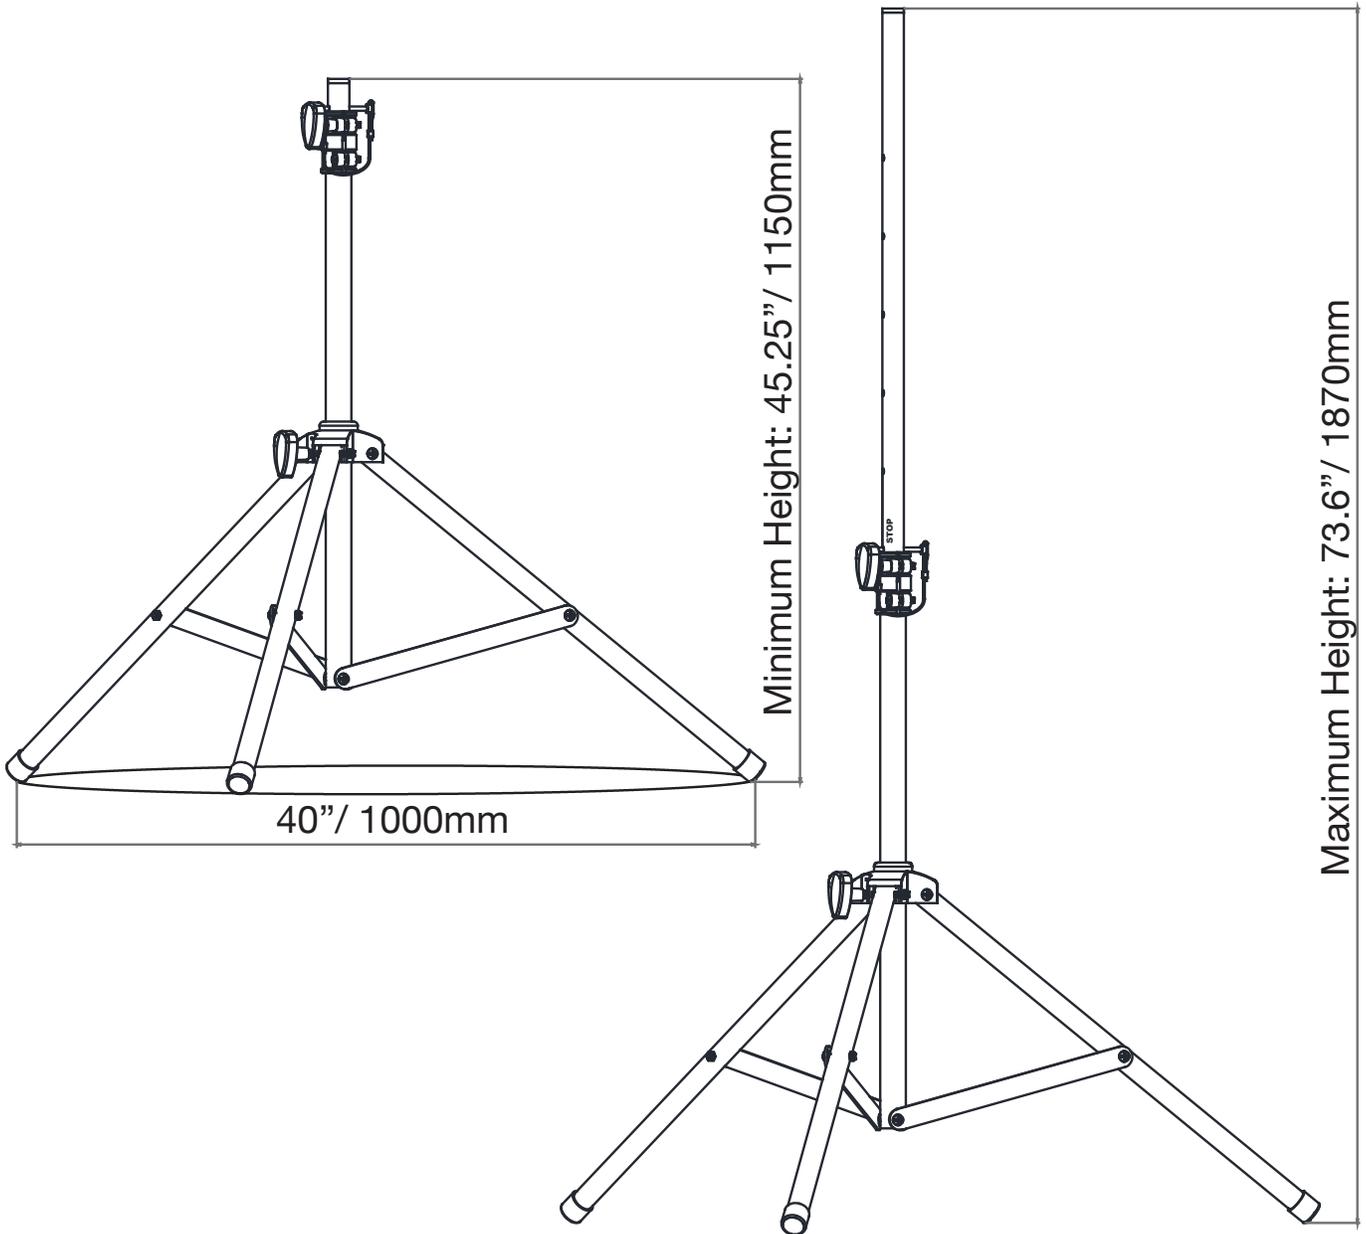

**End Brackets:**

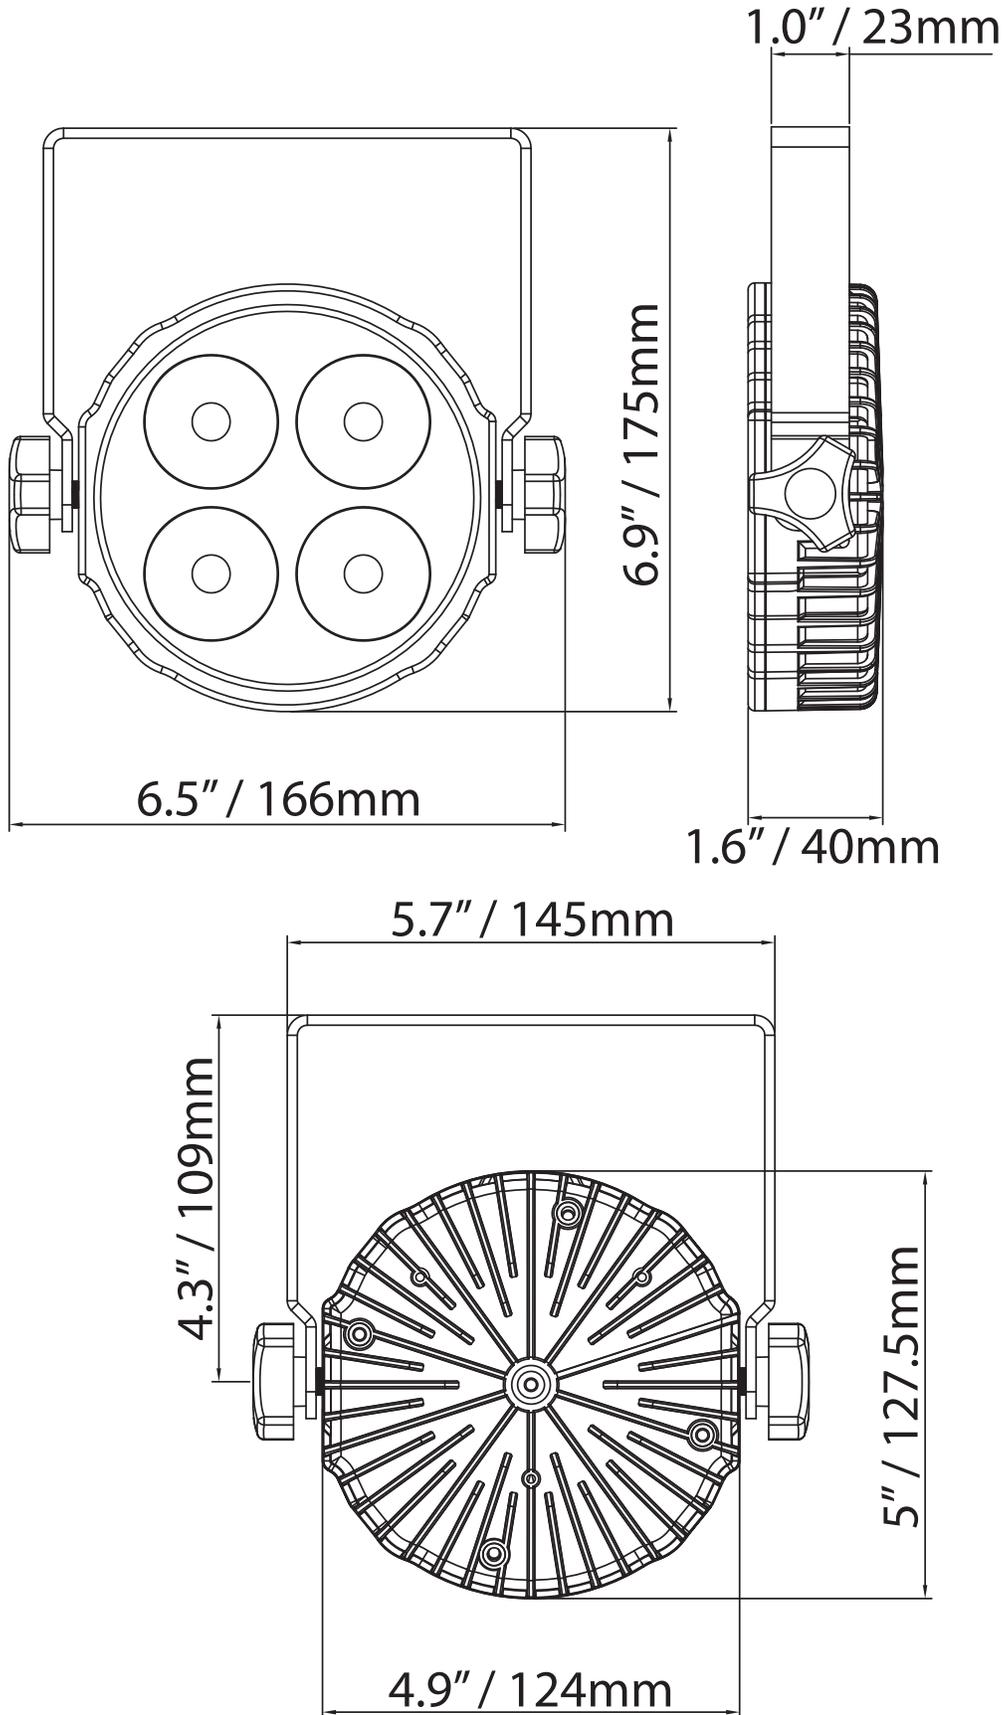

The Starbar Wash can be installed onto a ceiling or fixture using brackets and optional clamps.

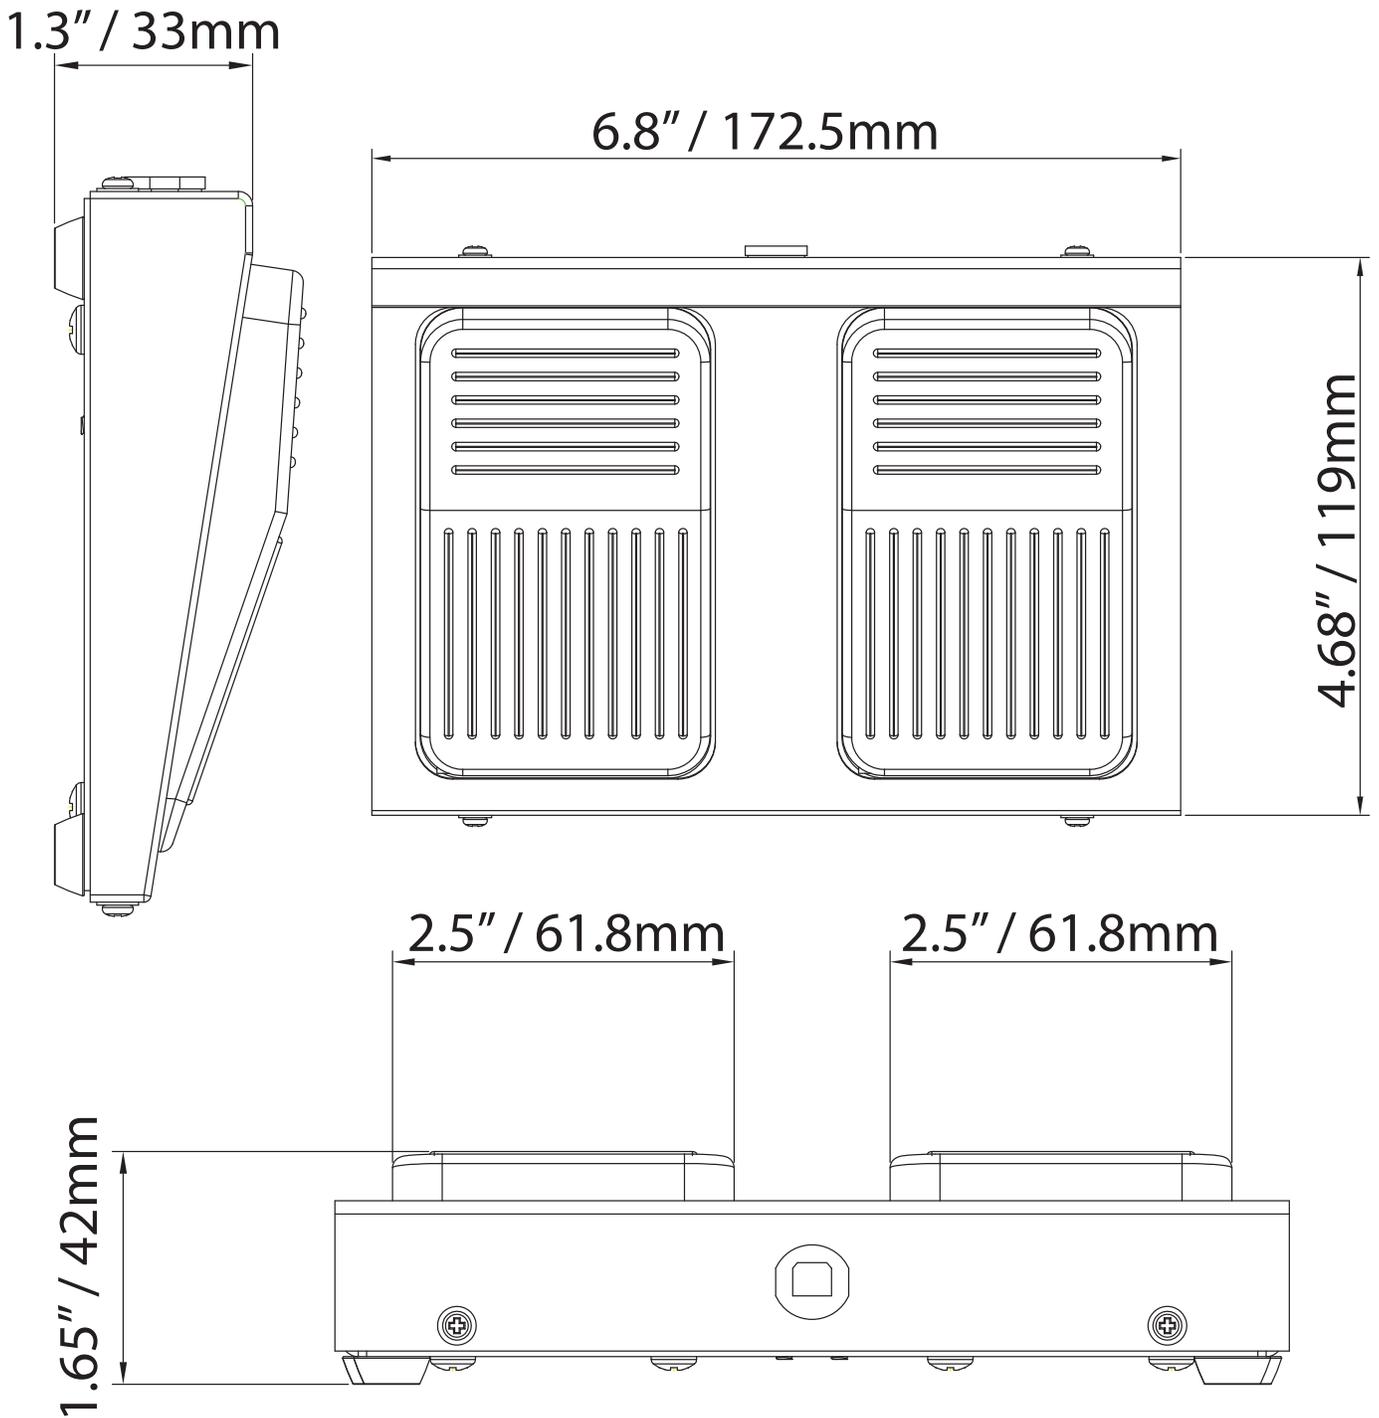

1. Install the mounting bracket by lining up the holes on the bracket with the threaded hole on the end of the Starbar Wash **(see Figure 4)**.
2. With a washer between the bracket and adjustment knob, install the adjustment knob **(see Figure 5)**. Tighten the adjustment knob by turning clockwise.
3. Repeat steps 1 and 2 for the other side.

Starbar Wash

Multiple Unit Power Linking

With this feature you can connect the fixtures to one another using the power cable input and output sockets.

NOTE: USE CAUTION WHEN POWER LINKING OTHER FIXTURES AS THE POWER CONSUMPTION OF OTHER MODEL FIXTURES MAY EXCEED THE MAX POWER OUTPUT ON THIS FIXTURE! CHECK SILK SCREEN FOR MAX AMPS.

Starbar Wash

Trouble Shooting

Listed below are a few common problems the user may encounter, with solutions.

Unit not responding to DMX:

1. Check that the DMX cables are connected properly and are wired correctly (pin 3 is “hot”; on some other DMX devices pin 2 may be ‘hot’). Also, check that all cables are connected to the right connectors; it does matter which way the inputs and outputs are connected.

Unit does not respond to sound:

1. Quiet or high pitched sounds will not activate the unit.
2. Make sure that Sound Active mode is activated.

Starbar Wash

Cleaning

Due to fog residue, smoke, and dust cleaning the internal and external optical lenses must be carried out periodically to optimize light output.

1. Use normal glass cleaner and a soft cloth to wipe down the outside casing.
2. Clean the external optics with glass cleaner and a soft cloth every 20 days.
3. Always be sure to dry all parts completely before plugging the unit back in.

Cleaning frequency depends on the environment in which the fixture operates (i.e. smoke, fog residue, dust, dew).

MANUFACTURER'S LIMITED WARRANTY

- A. ADJ Products, LLC hereby warrants, to the original purchaser, ADJ Products, LLC products to be free of manufacturing defects in material and workmanship for a prescribed period from the date of purchase (see specific warranty period on reverse). This warranty shall be valid only if the product is purchased within the United States of America, including possessions and territories. It is the owner's responsibility to establish the date and place of purchase by acceptable evidence, at the time service is sought.
- B. For warranty service you must obtain a Return Authorization number (RA#) before sending back the product—please contact ADJ Products, LLC Service Department at 800-322-6337. Send the product only to the ADJ Products, LLC factory. All shipping charges must be pre-paid. If the requested repairs or service (including parts replacement) are within the terms of this warranty, ADJ Products, LLC will pay return shipping charges only to a designated point within the United States. If the entire instrument is sent, it must be shipped in its original package. No accessories should be shipped with the product. If any accessories are shipped with the product, ADJ Products, LLC shall have no liability whatsoever for loss of or damage to any such accessories, nor for the safe return thereof.
- C. This warranty is void if the serial number has been altered or removed; if the product is modified in any manner which ADJ Products, LLC concludes, after inspection, affects the reliability of the product; if the product has been repaired or serviced by anyone other than the ADJ Products, LLC factory unless prior written authorization was issued to purchaser by ADJ Products, LLC; if the product is damaged because not properly maintained as set forth in the instruction manual.
- D. This is not a service contract, and this warranty does not include maintenance, cleaning or periodic check up. During the period specified above, ADJ Products, LLC will replace defective parts at its expense with new or refurbished parts, and will absorb all expenses for warranty service and repair labor by reason of defects in material or workmanship. The sole responsibility of ADJ Products, LLC under this warranty shall be limited to the repair of the product, or replacement thereof, including parts, at the sole discretion of ADJ Products, LLC. All products covered by this warranty were manufactured after August 15, 2012, and bear identifying marks to that effect.
- E. ADJ Products, LLC reserves the right to make changes in design and/or improvements upon its products without any obligation to include these changes in any products theretofore manufactured.

No warranty, whether expressed or implied, is given or made with respect to any accessory supplied with products described above. Except to the extent prohibited by applicable law, all implied warranties made by ADJ Products, LLC in connection with this product, including warranties of merchantability or fitness, are limited in duration to the warranty period set forth above. And no warranties, whether expressed or implied, including warranties of merchantability or fitness, shall apply to this product after said period has expired. The consumer's and/or Dealer's sole remedy shall be such repair or replacement as is expressly provided above; and under no circumstances shall ADJ Products, LLC be liable for any loss or damage, direct or consequential, arising out of the use of, or inability to use, this product.

This warranty is the only written warranty applicable to ADJ Products, LLC Products and supersedes all prior warranties and written descriptions of warranty terms and conditions heretofore published.
