Thank you for purchasing the BU-200 by American DJ®. For your convenience the BU-200 has been tested and is ready to be used, there is no assembly required. Please read the following instructions before installing or using your new Bubble Machine.

Operating Instructions:

Unit is ready to be set on flat surface. Pour standard bubble liquid or American DJ™ Bubble Juice, specially formulated for use with the BU-200, into front reservoir of unit, Plug unit into power. The BU-200 will immediately begin to produce bubbles. We suggest placing the unit high up so the bubbles will float longer.

Caution! Never place unit directly over high traffic area. Bubble juice will create a slippery surface.

Always drain fluid reservoir before transporting.
