Unpacking: When removing the Accent Strips from the plastic sleeve, please be very careful as the connecting pins are very delicate. Thank you for purchasing the Accent Strip RGB by Crystal Bright. Every Accent Strip RGB has been thoroughly tested and has been shipped in perfect operating condition. Carefully check the shipping carton for damage that may have occurred during shipping. If the carton appears to be damaged, carefully inspect your fixture for any damage and be sure all accessories necessary to operate the unit has arrived intact. In the case damage has been found or parts are missing, please contact our toll free customer support number for further instructions. **Do not return this unit to your retailer/dealer without first contacting customer support.**

Included in the carton should be 4x 9.75" self-adhesive strips with RGB LEDs, 1x Control Box, 3x 44" extension cables, and 1x AC Adapter. Make sure that everything is accounted for after opening.

Introduction: The Accent Strip RGB is a very thin, LED-circuit-strip-tape with nine bright RGB LEDs. It can be mounted to almost any clean surface using the provided adhesive tape. The Accent Strip RGB can be used in various indoor applications; at home, in the office, a retail environment or any various compact space. With the use of the easy-to-use control box users can select between 7 color and 3 different programs; Color Mixing, Static Color, or Color Cycle. **Do not connect more than 4 Accent Strips.**

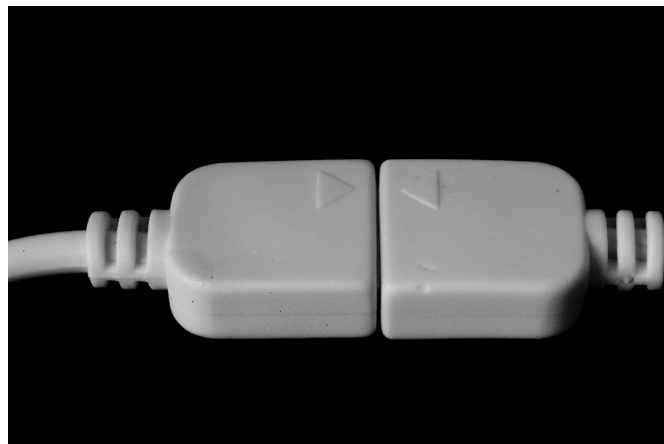

Controller Instructions: Use the provided controller to select your desired program or static color. Listed below is a description of the 3 programs. Each push of the button will change the program, except when you are in Static Color mode, then each push of the button will change to a different color. The button sequence are as follows: **Color Mixing - Static Color Red - Static Color Green - Static Color Blue - Static Color Yellow - Static Color Pink - Static Color Purple - Static Color White - Color Cycle.**

Color Mixing - With this program the Accent Strip RGB will mix and fade through the 7 different colors.

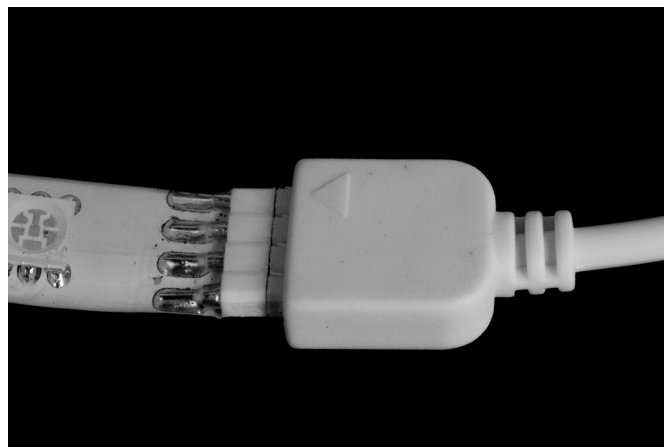

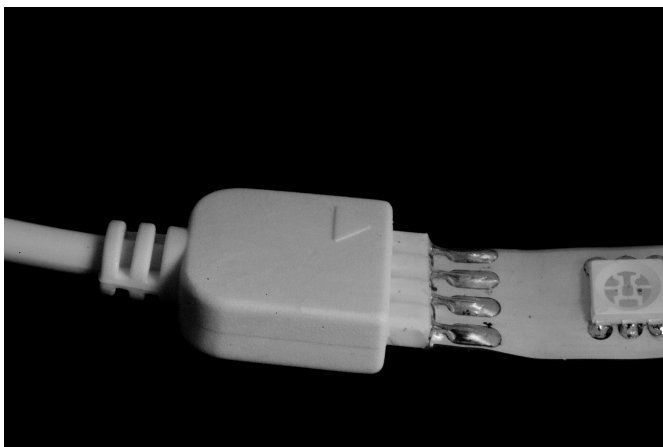

Static Color - In this program you can select 1 of the 7 colors to remain static (On). Only one color can be selected at a time. Every push of the button will move to the next color. When you reach the last color, which is white, the next push of the button will move you to the next program.

Color Cycle - In this program the Accent Strip will cycle through the 7 different colors.

CONNECTIING THE ACCENT STRIPS: Connecting the Accent Strips is really easy. The Accent Strips can be connected directly to each other or if you want to spread the strips out for longer runs you can use the provided extension cables. Follow the instructions below to connect using the extension cables.

You can either connect the Accent Strip directly up to the controller or use one of the extensions. If you choose to use an extension rather than connecting the Accent Strip directly to the controller make sure the arrows line up and are facing each other. Please see picture above.

When making the connection to the Accent Strip, follow the arrows located on the connector. With the Accent Strip facing up, make sure the the arrow located on the connector is at the top and facing the Accent Strip. Please see above pictures. Continue connecting Accent Strips in the same way. If you connect in strips any other way, they will not sync up.

Caution! No user serviceable parts inside do not attempt repairs. In the event your Accent Strip RGB should fail, contact American DJ. Do not return the Accent Strip to your retailer/dealer, please contact American DJ.

Customer Support: Crystal Bright is part of the American DJ Group of Companies.
